

Can you volunteer for Code Club World?

Code Club World is a nationwide network of volunteer-led, after-school coding clubs for children aged 9-11 that we aim to build in Greece

We need people who know how to program to volunteer to run a club for an hour once a week.

We create the projects for our volunteers to teach; the projects we make show children how to program, make computer games, animations and websites.

Help to teach the next generation to code, improve your CV and join the Code Club World global community!

See britishcouncil.gr/english/code-club-greece for more details
